

ABSTRACT OF THE DISCLOSURE

A scratch layer transfer sheet comprising a substrate film and a transferable scratch layer disposed on one surface of the substrate film, the transferable scratch layer comprising a hiding layer, being able to be thermally transferred to the print surface of a transfer-receiving material and being able to be removed from the print surface by scratching it after it is transferred. The scratch layer transfer sheet is overlapped on a transfer-receiving material such that the transferable scratch layer faces the print surface of the transfer-receiving material to transfer said transferable scratch layer to the print surface by heating.
